Cooperation with ECHO INVESTMENT in Cracow

'We have acquired a contract for works connected with providing low-voltage installations at the construction site of an office complex Brain Park at Fabryczna Street in Cracow.

We are glad to participate in a contract from such a renowned brand as Echo Investment to help build a complex with total area of over 42,000 square meters. It is undoubtedly a great success for us and an opportunity to yet again prove our expertise in providing FAS, SAS, automation of fire-protection ventilation systems, etc.; and this time on our local Cracow market,' says Bernard Rzepisko, COO and Member of the Management Board of IPID Engineering Sp z o.o.
