RYVU THERAPEUTICS LABORATORY

Cracow

The heart of the new facility Ryvu Therapeutics is a complex of research laboratories in the scope of medical chemistry, biochemistry, molecular biology, cellular biology, and analyses, necessary for conducting research in innovative medicines. At the request of the General Contractor Mota-Engil Central Europe S.A., we provided BMS, MCE and RMS for the entire project.

Project highlight:

Over 3,000 square meters of laboratory area

Installations:

 Automation

Completion date:

2020
